

PAIL, ECOSTA 10

Besides the optimal utilization of the pallet the pail ecosta 10 offers several advantages to the filler and user. For waterbased fillings an inside laminated pail is available. We produce the sizes 3 to 6 liter. Of course, outside printing according to your requirements is possible.

THE 10 ADVANTAGES AT A GLANCE

- efficient material deployment
- conical: space saving during transport / storage
- stable + click: easy closing
- dens: inside protected by foil (laminating)
- resistible against waterbased fillings: inside protected by foil (laminating)
- stackable
- stable + cams: easy open
- discharge help
- optimal draining: wide opening
- high recycling rate

... in a word: * ecological, * economical, * stable, * stackable
